FIRE FITTING SYSTEM

- ✚ we develop and supply advanced firefighting products and systems, supported by first class service. People and businesses everywhere trust our brands and depend on our expertise to protect what is most valuable.
- ✚ Fire Fitting can protect your business property from damages that may be caused by fire and this is why business needs to seek for fire fitting services. When an alarm warning is triggered, a timely intervention can save lives and reduce loss of property. This is why businesses that are adequately installed with fire fittings are likely to face fewer damages when fires arise, compared to those, which are not fully equipped. In addition, there is need for fire fitting monitoring services especially in times when there are no people around business premises. When there are no people, alarm sounds may not be responded to in time and fires can cause great damages.

FIRE ALARM SYSTEM

- ✚ An automatic fire alarm system is designed to detect the unwanted presence of fire by monitoring environmental changes associated with combustion. In general, a fire alarm system is classified as either automatically actuated, manually actuated, or both. Automatic fire alarm systems are intended to notify the building occupants to evacuate in the event of a fire or other emergency, report the event to an off-premises location in order to summon emergency services, and to prepare the structure and associated systems to control the spread of fire and smoke.
- ✚ Home Fire Alarm and Commercial Fire Alarm Systems Fire alarm systems has long been a staple of commercial building security, but today, because of more affordable technology and the value of many homes, fire alarm systems are also an important part of a residential security plan.

Tasks of fire protection system's service

- ✚ We provide constant access to main replacement parts of: sprinkler system, hydraulic system, water mist system, gas extinguishing and fire detection system, which allows us to service them in case of faults.
- ✚ We end our services with giving our clients protocol with description of the assemble, possible observations and recommendations that can have direct impact on safety and proper operation of firefighting systems at the protected object.
- ✚ We provide maintenance for people responsible for firefighting systems at each object, also after technical receiving.
